

## **cult/efecto**

### **A prestigious presence**

In this creative kitchen design cabinets in an overall height of 260 cm are dressed to impress.

The efecto glass display cabinets with elegant slim-style frames add relief to the tall units in black smoked oak. Additional interior drawers can be placed in a linear arrangement behind see-through glass. Smooth-operating inwards sliding pocket doors flank the ensemble of glass display cabinets on the left and right, laying bare their heart and soul only once open.

The highlight of the kitchen island reveals itself on second glance only - the worktop virtually fuses with the base unit fronts, both of high-quality ceramic. The Storm Gris matt ceramic together with the noble and enduring smoked oak decor looks particularly expressive.

The finger grip routings in the veneered base unit fronts appear to have been handcrafted. Positioned one on each side they offer a uniform look and can therefore be flexibly used in a lineup of adjacently installed units. With matching sideboards and a clearly defined design, the kitchen opens up stylishly to the living area, thus becoming a cosy end-of-the-day meeting place.
