

zero ash / carbon grey rendered effect + blackwood repro

Storage space galore

This kitchen design can boast an abundance of storage space. Providing a clear overview, the individual cutlery compartments are sensibly arranged below the built-in appliances and dark blackwood decor open shelving - thus all the frequently used kitchen aids are always within easy reach and quick to hand.

Everyday life in the kitchen is additionally facilitated by an oven, steamer and coffee maker, all set at the optimum operating height for maximum comfort and convenience.

■ The mirror wall panelling in the midway recess between wall and base units further reinforces the kitchen design's impression of spaciousness, at the same time as producing a vibrant play of light that superbly highlights the cabinet fronts in ash and rendered-effect carbon grey.
